

Figure 3 consists of two parts, (a) and (b), comparing generated Chinese characters.

Part (a): Compares generated characters with different style weights. It shows five pairs of characters, each pair consisting of a source character (content) and a generated character. The generated characters are styled based on the weight of the target style. The columns are labeled: Source (content), Weight (content), Target (style), and Ours. The target styles shown are: 濛 (red box), 濛 (orange box), 濛 (yellow box), 濛 (grey box), 濛 (purple box), and 濛 (blue box).

Part (b): Compares generated characters with different style weights and target styles. It shows four pairs of characters, each pair consisting of a source character (content) and a generated character. The generated characters are styled based on the target style. The columns are labeled: Source (content), Weight (content), Target (style), and Ours. The target styles shown are: 春江潮水连海平 (red box), 潺滟随波千万里 (orange box), 江流宛转绕芳甸 (yellow box), and 空里流霜不觉飞 (grey box).
